

# Please cooperate in attaining smooth traffic conveyance during the Tokyo 2020 Games.

The 2020 Olympic and Paralympic Games will be held in Tokyo this summer. There will be many athletes, media covering the Games and visitors visiting Tokyo during the Games, so there is concern that serious traffic congestion will occur on the roads and public transit if we do not implement some measures to circumvent that.

**Without any countermeasures during the Games...**

**Traffic congestion on the Metropolitan Expressway will be doubled**

The number of vehicles traveling on our roads will be increased by approximately 50,000 to 60,000.

**The number of railroad travelers will increase by approximately 10%**

Approximately 800,000 visitors will use the railroads every day.

**Without any measures or preparations, there is the possibility of increased risk of delays, such as by the movement of people and products being negatively affected.**

**For example,**

- The conveyance of parts and the like will be delayed.
- Products will not be delivered to supermarkets and convenience stores and the like.
- Package deliveries will not be delivered on time.
- Maintenance and inspection engineers will be late.
- ATMs will run out of cash.
- People will be late to start work, or to have business meetings or negotiations.

**It is important to make preparations to circumvent such risks, and to be able to continue stable economic activities during the Tokyo 2020 Games period.**

**To all of corporations  
Please first register to 2020 TDM Promotion Project**

**When you register, you will receive by email or magazine early information regarding traffic during the 2020 Tokyo Games period.**

\* There are no costs or obligations generated by registration.\* Each department can also register on its own.

**2020 TDM Promotion Project** is organized and controlled by the Tokyo Metropolitan Government, the Cabinet Secretariat, and the Tokyo 2020 Organizing Committee. It is undertaking efforts to suppress traffic demands to balance between smooth games operations and transportation for the Tokyo 2020 Games, and maintaining economic activities.

**Benefits of registration**

Individual consulting sessions by consultants

Seminars, explanation meeting guide

Cooperative organizations are listed on the HP as a sponsor of the 2020 TDM Project

Notification of updated information to the Map of Games' Influence on Transport

As part of the comprehensive plan to promote an environment in which all people work lively and make a contribution to society, the Tokyo Metropolitan Government (TMG) has implemented the "Smooth Biz" initiative aimed at reducing transportation congestion during the Tokyo 2020 Games through an effective Transportation Demand Management (TDM) as well as the promotion of telework and flex-biz (flexible working and commuting hours). Corporations that register to 2020 TDM Promotion Project will be handled as supporters of "Smooth Biz" initiative unless they make a specific offer.

## [2020 Calendar]

Olympics: July 24 to August 9 Paralympics: August 25 to September 6

## Preparation checklist

First and foremost, see the check list to see what your company should be doing during the Games period.

### Check 1 Please check the degree of influence on your company

Let's apply a check mark to relevant items.

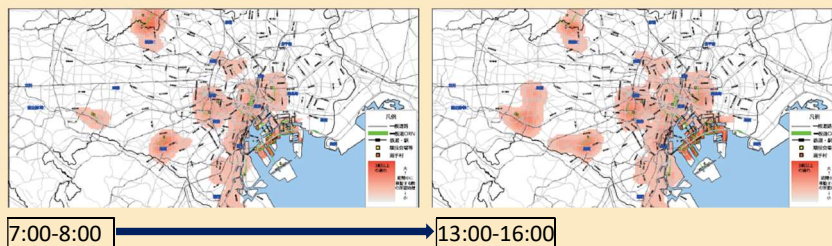

- Have offices or business partners near competition venues
- Use highways
- Often use vehicles during day
- Often use home deliveries
- Work involves importing and exporting
- Have deliveries from the waterfront
- Commonly used routes passes through areas that will be affected by the Games

#### Reference: Map of Games' Influence on Transport

A map forecasting congestion has been released to the public showing the effects on general roads and highways, and roads in the vicinity of the competition venues, if no measures are implemented during the Games period with 2020 TDM Promotion Project.

When checking the degree of influence on your company, please refer to this.

Example: Forecast congestion on general roads on July 31, 2020

### Check 2 Please create a 2020 action plan (action plan for the Games period)

#### 1. Consider assumed issues and measures

I'm worried about my employees coming to work on time

Let's apply a check mark to items you might be able to implement.

- Take pre-planned holidays during the Games period
- Introduce staggered working hours
- Introduce the flex-time system
- Introduction of tele-work
- Substitute email and telephone calls for meetings
- Change your working hours
- Close work in line with the Games period
- Reduce waste

I'm worried about my deliveries won't be made on time

Let's apply a check mark to items you might be able to implement.

#### Necessary discussions to be made with the shipper

- One extra day of lead time
- Simplify inspections
- Ship by avoiding the Games period (ship before or after)
- Reduce the number of re-deliveries
- Change shipping and collection times

#### Ingenuous efforts in your company.

- Substantial amount of stock in advance
- Circumvent or detour congested regions
- Increase stacking efficiency (share, ensure return loads)
- Standardize pallets etc.

#### 2. The items you check are Step 1 for your company's 2020 Action Plan

Step 1. Determine specific items to implement (what to do, and what to start)

Step 2. Determine the responsible person/departments

Step 3. Confirm methods of implementation

When creating the 2020 action plan, you may also utilize individual consulting through a support system for implementation using consultants.
